# PROBLEM STATEMENT

- Twenty-nine children in Madhya Pradesh, and 14 in Rajasthan went missing per day in 2021: NGO report, referred in The Hindu. So there is a need for child monitoring gadgets. So, this may help to get clues for police by their locations.
- The child needs to be monitored even when the parents are distracted. Since the child can move too far away and outside the circle of safety. In such cases, the child may get kidnapped, get wounded, get into an accident, face any health issue, or can be lost in the crowd.
